

Sony Handycam CCD-TR5 Tape Transport Unit Replacement

This guide will show you how to remove the tape transport unit in a Sony Handycam CCD-TR5 for replacement.

Written By: Emma

INTRODUCTION

In order to keep your device in working order, the tape transport unit may need to be replaced.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Tape Transport Unit

- Remove the eight (8) Phillips #00 screws. There are six (6) screws on the bottom of the camera and two (2) screws beneath the back light button.

Step 2

- Remove the five (5) Phillips #00 cassette side screws.

Step 3

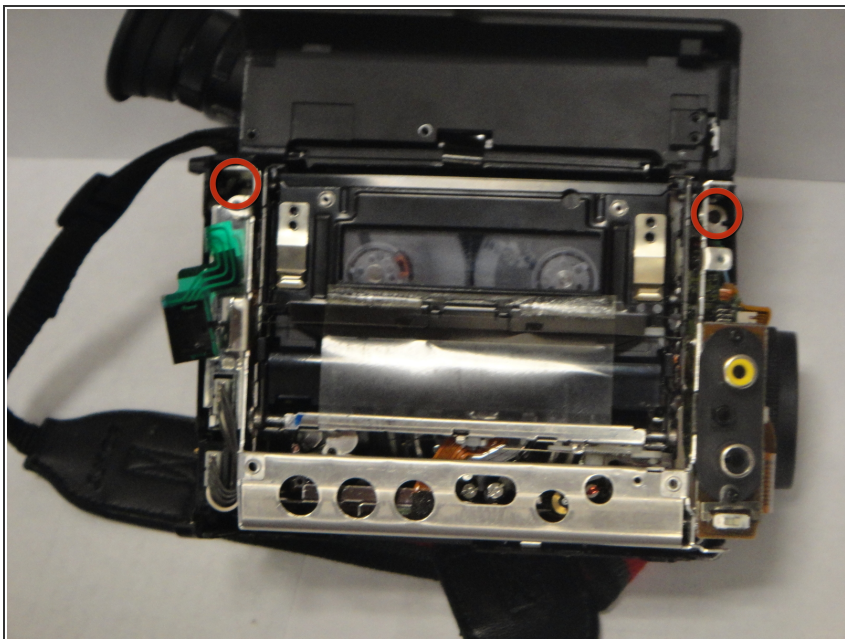

- Remove the three (3) Phillips #00 screws located on the top of the lens side cover.

Step 4

- Remove the Phillips #00 screw holding the microphone on.

Step 5

- Remove the two (2) Phillips #00 screws from lens side cover.

Step 6

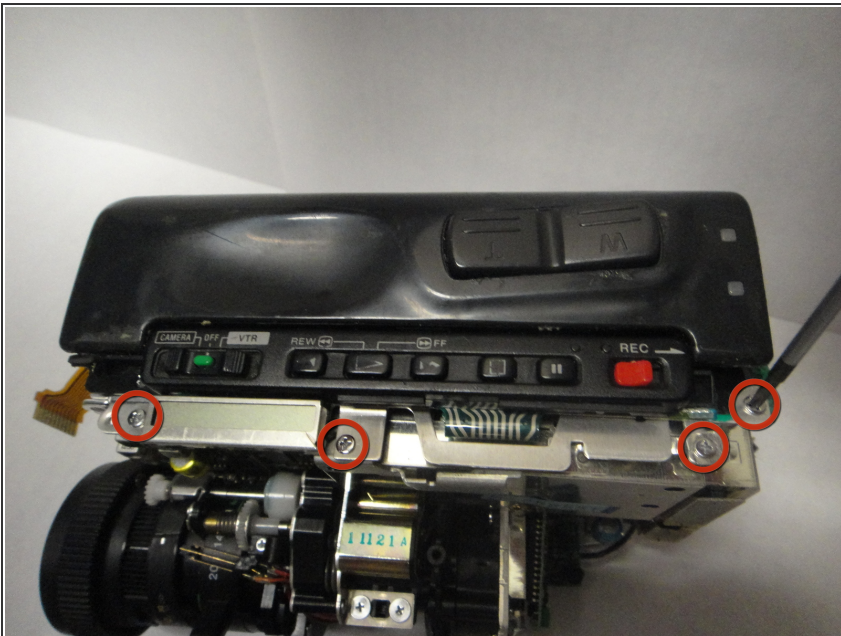

- Slide the lens side cover away from camera.

Step 7

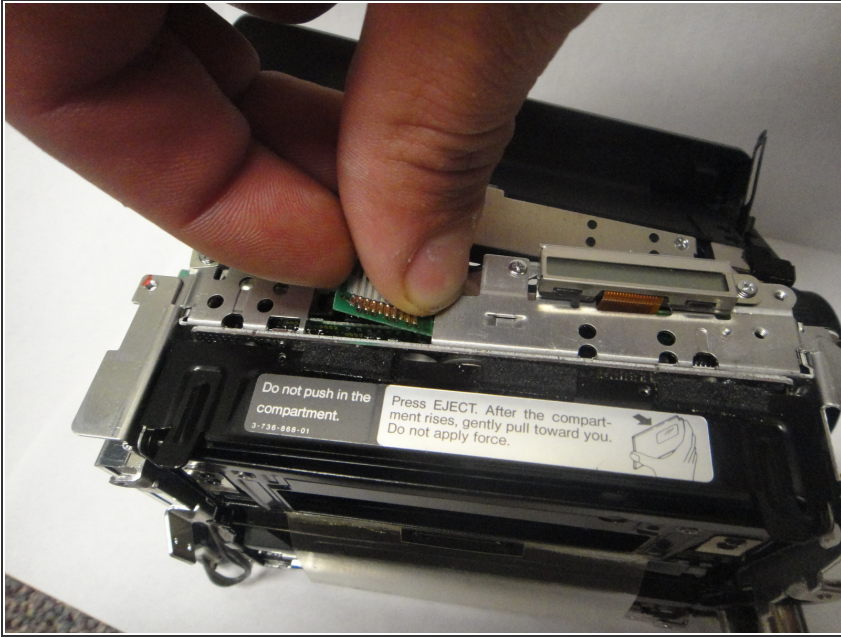

- Remove the Phillips #00 screw from the tape transport slider.

Step 8

- Remove the four (4) Phillips #00 screws located on the top of the camera.

Step 9

- Remove the electrical connector from camera.

Step 10

- The tape transport unit is now free from the camera.

To reassemble your device, follow these instructions in reverse order.
